DESCRIPTION OF THE PREFERRED EMBODIMENTS

Please insert the following at page 5, between lines 27 and 28:

As shown in Figure 2, the degree of security of cryptography functions used in a communication terminal may be set by receiving situation-indicating parameters in the communication terminal 27, determining security parameters based on the current received situation-indicating parameters in the communication terminal 28, and using the security parameters by the cryptography functions 29.
